

What is poor corporate governance costing you?

***Don't miss anything!
Ensure continuity and conformance to a best practice enterprise
governance.***

www.rubi-q.com

In an economic environment where there is intense pressure on business margins and maintaining a competitive advantage, it is critical to ensure that best practices are soundly in place to manage sustainability and growth in a rapidly changing landscape.

Today's landscape includes the impacts of social media, the new drivers of corporate reputation and brand sustainability, as well as the never ending onslaught of regulatory and compliance obligations. Often however, key areas of failures are hard to nail down and point to the underlying problems.

The RUBiQ® Business Efficiency Management Solution, embedded with the GovN® Corporate Governance Framework, is built on international standards, such as ISO 31000, ISO 9001, and ISO 27001, while it is fully aligned to King IV.

The RUBiQ® GovN® solution ensures the maximum benefit for the end client as it provides integrated policy and procedure templates covering each of the 9 Chapters of King IV.

To ensure entrenchment and accountability, the RUBiQ® automated electronic platform is used to fully entrench governance charters and policies throughout the company.

A fully controlled and managed process for all charters, policies and procedures is therefore possible to embed and sustain a daily culture of good corporate governance.

The combined framework and electronic platform enables the Board and management to monitor and manage the critical links between company objectives, procedures, activities and outcomes, while highlighting and handling risks and exceptions.

By using the GovN® Framework within the RUBiQ® Platform, companies, their directors and executives are able to ensure that:

- ✓ All principles of King IV are applied according to best practice
- ✓ Evidence of governance procedures are retained
- ✓ A centralised, structured file management system enables easy access
- ✓ Review and renewal procedures are incorporated and automated
- ✓ The delegation of governance procedures is documented
- ✓ Governance communication intra-company and with stakeholders is enabled.
