RUBiQ® BI reporting aims to provide a series of dashboards and automated intelligent reporting, that supplies management with knowledge to review and make informed decisions for improvement / change and correction of the organisation at any relevant level needed, without lags, inaccuracies and opinions.

Through the integration of the power of the Yellowfin BI reporting capability embedded within the BizTech RUBiQ® GRC Cloud solution, we are able to put powerful decision making information into the hands of the right people at the right time.

By using the RUBiQ® Platform for Enterprise Reporting Management, companies, their directors and executives are able to ensure that:

- ✓ The right decisions are made for the best benefit of the company and all its stakeholders
- ✓ Reported information is cross referenced, validated and checked in real time
- ✓ Management and Board Reporting is current and accurate
- ✓ Corrective Action strategies and plans are monitored, ensuring nothing gets left unattended or missed
- ✓ Performance threshold breaches are immediately brought to management attention
- ✓ Continuously improved business operations through real time access to integrated information
